

## Innovative Products and Careers

**TXC 198 (2 units), or**

**TXC 98 (2 units)**

Please join us for a very special two-unit class we are offering this Spring quarter 2009. It is the perfect course for anyone who wants to explore more about cutting edge technologies and opportunities in the areas of fibrous materials, textiles, and apparel. This class will include presentations from a variety of speakers. Students will be exposed to numerous design ideas and suggestions for careers in research, sustainability, design, and product development.

### Learn more about:

- **Bullet proof clothing**
- **Functional clothing for dangerous occupations (race car driving, deep sea fishing)**
- **Green, recycled, sustainable clothing**
- **Materials for non-clothing purposes**

This seminar-style course will meet every Tuesday in Spring quarter from 4:10-5:30pm in 204 Art. It is a P/NP course so attendance will be crucial for getting a Pass. The coordinators for the course will be Dr. You-Lo Hsieh and Joan Chandler. You can sign up for it by using ONE of the following CRNs:

**CRN 91493 TXC 98** (if you have less than 84 units)

Or

**CRN 91546 TXC 198** (if you have  $\geq$  84 units)

Please e-mail Joan ([jlchandler@ucdavis.edu](mailto:jlchandler@ucdavis.edu)) if the class fills up and you need a PTA.
